**JMAA** is currently looking for qualified candidates to fill the “**Electrician**” role.

**What traits do we seek? Successful candidates will...**

- Demonstrate excellent journeyman-level electrical maintenance and installation of electrical equipment.
- Display strong initiative while being attentive to details and compliance-focused.
- Shine at providing excellent electrical tasks such as repairing and/or wiring electrical fixtures, electrical components, and computer-based control equipment, which involves diagnostic troubleshooting ability.
- Associate degree or Trade School Certificate in electrical installation and repair is strongly preferred.
- A minimum of 3 years of experience as an electrician or related experience is required.
- Electrician License is required.
- Be able to pass and maintain background and security clearance
- Have a valid Mississippi driver's license with a class B endorsement and the ability to receive authorization to drive in secured areas.

**What Do You Get to Do? You will...**

- Performs preventative maintenance and service on electric generators, jet bridges, and baggage retrieval systems.
- Installs, diagnoses, and repairs electrical systems, apparatus, and electrical and electronic components of industrial machinery and equipment in accordance with electrical codes, manuals, schematic diagrams, blueprints, and other specifications.
- Reads and interprets plans, blueprints, and specifications for construction and remodeling and may recommend appropriate modifications or additions to plans.
- Performs maintenance and repairs to electrical equipment, including fluorescent and incandescent lighting fixtures, wiring, conduit boxes and tubing, switches, motors, generators, and climate control systems.
- Installs, repairs, and maintains high voltage distribution systems and multiple lighting systems on airport runways, taxiways, and ramps.
